EDUCATION

Dr. A.P.J. Abdul Kalam Technical University

B.Tech in Computer Science Engineering (AI & ML)

Lucknow, UP, India

Aug. 2025 – Aug. 2029

- **KCC Institute of Technology and Management**, Greater Noida (Affiliated College)
- **Current GPA:** 8.05 / 10.0

PROJECTS

SightX | [GitHub](#) | Python, YOLOv8, SQLite, Machine Learning, Deep Learning

Mar. 2026

- Led a development team to engineer a real-time automated crowd surveillance system utilizing deep learning to detect violent activities with high confidence scores.
- Integrated system-level monitoring protocols to track resource metrics alongside automated logging of incident timestamps into an optimized SQLite database.
- Developed an intuitive desktop application interface featuring dynamic video overlays and real-time alerts for rapid threat identification.

SignVise | [GitHub](#) | Python, Mediapipe, OpenCV, Pyttsx3, Machine Learning

Jan. 2026 – Feb. 2026

- Built an inclusive technological framework to empower individuals with speech and hearing impairments using a sophisticated text-to-speech translator that converts hand signs into audible speech.
- Designed a touchless "Virtual Mouse" system leveraging computer vision to allow full system navigation and hardware control solely through dynamic hand gestures.
- Implemented an interactive sign language education module ("Hand Master") providing real-time user performance tracking, a built-in assistant chatbot, and a 5-second sustained gesture emergency SOS system.

HACKATHONS & ACHIEVEMENTS

HackIndia Spark 4 Hackathon 2026 (NCR East Region)

Greater Noida, India

National-Level Competitor

Mar. 2026

- Advanced through the intense online eliminator phase to qualify for the 36-hour nonstop flagship offline hackathon among 1,000+ national registrations.
- Collaborated in an intense overnight sprint to engineer, debug, and pitch a production-ready software application evaluated across multiple formal industry mentor rounds.

Cybrathon & Aestr Alpha AI Summit 2026

Jaipur, India

National-Level Prototype Developer

Feb. 2026

- Competed in the multi-stage national engineering hackathon framework hosted by Suresh Gyan Vihar University focusing on cutting-edge AI & ML solutions.
- Successfully passed initial ideation screening phases to enter the core development phase, designing operational software prototypes under competitive evaluations.

National Tech Expo 2026

Gujarat, India

Shortlisted Project Presenter

Feb. 2026

- Selected to showcase emerging technical solutions at Parul University's national-level technology exposition gathering top student innovators.
- Presented project architecture to a judging panel of industry experts and tech enthusiasts, defending system scalability and implementation methodologies.

TECHNICAL SKILLS & CORE COMPETENCIES

Programming Languages: Python, C, C++, SQL (MySQL)

Data Structures & AI Stack: DSA, Machine Learning, Deep Learning, PyTorch, TensorFlow, Scikit-learn

Libraries & Frameworks: OpenCV, MediaPipe, Pandas, Matplotlib, NumPy, Power BI (Data Visualization)

Developer Tools & Software: Git, GitHub, VS Code, Microsoft Office Suite, Video Editing Tools

Professional Competencies: Public Speaking, Debate & Oration, Persuasive Communication, Team Management, Technical Research

Languages: Hindi (Native), English (Fluent)
